

Coastal Bend Emergency Management Association

2021 Coastal Bend Hurricane Conference, Multiple Storm Challenge

Our 10th year will focus on best practices and lessons learned in: Whole Community Planning
* Real-World Response * Virtual Coordination

The Coastal Bend Emergency Management Association in cooperation with numerous governmental and non-government partners, is pleased to announce the return of the Coastal Bend Hurricane Virtual Conference on Wednesday, May 5, 2021. The Coastal Bend Hurricane Conference has great success because it ensures all community stakeholders have access to high quality training and networking that is typically only available at larger, more expensive, state and national level conferences.

The 2020 conference and regional exercise had over 1,000 participants representing the full range of local, state and federal governmental responders and policy makers, voluntary organizations, healthcare professionals, private businesses and industry representatives. Our audience includes professionals ranging from those new to emergency preparedness, all the way to expert emergency managers, with many years of experience.
